PROFESSIONAL SUMMARY

- Full Stack Web Developer (MERN) with hands-on experience building scalable, real-time web applications and startup platforms.
- Currently developing and deploying production-level solutions, including a crypto intelligence platform and influencer analytics tools used for data-driven decision making.
- Strong in React.js, Node.js, and REST API design, with a focus on performance optimization, authentication systems, and user-centric interfaces.
- Proven ability to lead teams, ship features fast, and collaborate in startup environments to deliver high-impact products.

EDUCATION

- KIET Group of Institutions** Ghaziabad, India
B.Tech in Electronics and Communication Engineering 2024 – Present
 - CGPA: 8.2/10
 - Relevant Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Full Stack Development

TECHNICAL SKILLS

- Languages:** JavaScript (ES6+), HTML5, CSS3
- Frontend:** React.js, Tailwind CSS, Responsive Design
- Backend:** Node.js, Express.js, REST APIs, JWT Authentication
- Database:** MongoDB, Mongoose
- Tools & Deployment:** Git, GitHub, Postman, Vercel, Render
- Concepts:** MVC Architecture, Role-Based Access Control, Real-Time Data Processing

EXPERIENCE

- Full Stack Web Developer Intern** | [Flinque](#) March 2026 – Present
 - Built a real-time Instagram analytics tool to detect fake followers, measure engagement rates, and apply niche and location-based filters — reducing manual analysis time for brand teams.
 - Resolved **15+ bugs** across the influencer-brand marketplace, improving UI responsiveness and reducing reported user errors.
 - Contributed new MERN stack features to the core platform, collaborating directly with the founding team on product priorities.
- Web Development Lead** Sept 2024 – Sept 2025
DSDL (College Society)
 - Led a team of **15+ developers** to build and deploy event platforms that handled **2,000+ concurrent users** without downtime.
 - Owned end-to-end project execution — task distribution, code reviews, and cross-team coordination with backend and design.
 - Reduced page load time by optimizing asset delivery and component rendering across event microsites.

PROJECTS

- CipherVest Capital — Founder & CTO** | [GitHub](#) | [Live](#) 2026 – Present
 - Founded and built a full-stack finance and crypto intelligence platform from scratch, serving as sole architect and developer.
 - Implemented JWT-based authentication, dynamic dashboards, and scalable RESTful APIs; deployed on Vercel (frontend) and Render (backend).
 - Designed a fully responsive React UI with real-time data interaction, targeting retail crypto investors.
 - Tech:** React.js, Node.js, Express.js, MongoDB, JWT, Vercel, Render
- Satellite Telemetry Monitoring System** | [GitHub](#) Dec 2025 – Feb 2026
 - Built a real-time dashboard to visualize live sensor streams from satellite telemetry data, applying ECE domain knowledge in signal processing to structure the data pipeline.
 - Secured all data endpoints with JWT-authenticated REST APIs; designed backend for continuous ingestion and analytics.
 - Tech:** React.js, Node.js, Express.js, MongoDB, JWT
- Smart Border Surveillance Simulation** | [GitHub](#) Aug 2025 – Oct 2025
 - Developed a real-time threat detection system classifying humans, vehicles, and animals using multi-category logic with automated alert generation.
 - Processed simulated sensor events through an Express.js pipeline, persisting categorized alerts to MongoDB for audit and review.
 - Tech:** Node.js, Express.js, MongoDB, REST API
